

ISOC Bengaluru Outreach to Rural Government schools

Santhebennur,
Davangere

Introduction

The ISOC India Bengaluru Chapter conducted an Internet literacy and digital awareness session at a government school in rural Karnataka.

The initiative aimed to promote meaningful Internet access and digital inclusion among students in underserved communities.

Objective of the Session

The session focused on introducing students to basic Internet concepts and safe online practices. It aimed to empower young learners with essential digital knowledge for confident and responsible Internet use.

Key Topics Covered

Students were introduced to how the Internet works and its importance in daily life. The session emphasized safe and responsible Internet usage. It also explained cyberbullying and how students can recognize and report it. Students learned about misinformation and disinformation and shared their online experiences through interactive discussion.

Impact and Community Engagement

The program helped build basic digital literacy and Internet awareness among rural students. It encouraged responsible and informed use of online platforms. Such initiatives support bridging the digital divide in underserved communities. The ISOC India Bengaluru Chapter thanked the school administration, staff, and volunteers for their support.
