Introduction

The Internet Society (ISOC) India Bengaluru Chapter formally signed a Memorandum of Understanding (MoU) with KLE Technological University, Dr. M. S. Sheshgiri Campus, Belagavi, Karnataka, on April 17, 2025.

This collaboration marks a significant step toward strengthening academic–industry engagement and promoting capacity building in the fields of Computer Networks and Internet technologies. The MoU establishes a structured partnership aimed at enhancing technical knowledge, innovation, and community engagement.

The signing ceremony reflected a shared commitment to supporting students and faculty members in developing practical skills and understanding emerging trends in Internet technologies.

Purpose of the Collaboration

The primary objective of this MoU is to foster a collaborative ecosystem that promotes learning, innovation, and real-world exposure.

Through this partnership, ISOC India Bengaluru Chapter and KLE Technological University aim to:

Strengthen knowledge and practical skills in Computer Networks and Internet technologies. Encourage meaningful interaction between students, faculty, and industry experts.

Support innovation through workshops, seminars, and training programs. Address evolving technological and community-driven needs through joint initiatives.

Key Areas of Focus

The collaboration focuses on enhancing academic and professional development.

It includes organizing workshops, expert talks, bootcamps, and certification programs.

These activities aim to strengthen students' technical skills.

Industry engagement will connect students and faculty with professionals.

This provides exposure to real-world Internet technologies.

The initiative promotes collaborative research and innovation.

Key areas include network security and Internet governance. It also supports community awareness for an open, secure, and inclusive Internet.

Significance of the MoU

This partnership highlights the importance of academic–industry collaboration in today’s rapidly evolving digital environment.

By combining ISOC’s expertise in Internet technologies with the academic strength of KLE Technological University, the MoU aims to create long-term value for students and the technical community.

It serves as a platform to bridge the gap between theoretical education and practical industry requirements.

The collaboration encourages knowledge exchange, skill development, and exposure to real-world challenges.

It provides opportunities for students to engage in workshops, research initiatives, and industry interactions.

Furthermore, the partnership promotes innovation, digital inclusion, and responsible technology practices.

Expected Outcomes and Future Prospects

The collaboration aims to enhance students' technical knowledge and practical skills.

It promotes awareness of Internet security and digital inclusion.

Structured programs will provide hands-on learning opportunities.

The partnership encourages innovation and collaborative research.

It strengthens connections between academia and industry professionals. The MoU opens avenues for experiential learning and academic growth.

Both institutions are committed to implementing impactful initiatives. The collaboration supports the vision of an open, secure, and inclusive Internet.
